### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 2, 2006 has been entered.

### ***Claim Objections***

Claim 14 is objected to because of the following informalities: In claim 14, it is unclear as to what is meant by the recitation of "**represents** an objective lens". Appropriate correction is required.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 7-10,12-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-43 of U.S. Patent No. 5,995,867.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they involve an obvious broadening of the patented claims.

Claims 7-10,12-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 60668,186. Although the conflicting claims are not identical, they are not patentably distinct from each other because they involve an obvious broadening of the patented claims.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 7-10,12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maly et al. Maly et al disclose a method of treating tissue/cells and monitoring such treatment using a confocal microscope. The confocal microscope allows optical sectioning which is carried out by moving the plane of focus. The sections can be at a depth under the surface of the tissue (see column 7, lines 61-64). Maly et al disclose that the images can be of tissue that includes cells. Maly et al further disclose (as seen for example in column 13) that the treatment can involve laser surgery which effects are monitored by confocal microscope images. Laser surgery inherently involves the use of some optics to focus the beam. The imaging and treatment therefore include the use of

optics. It would have been obvious to one skilled in the art to have modified May et al such that the imaging and treatment share some of the same optical components in order to reduce system cost and size as is a well known expedient in the art. With respect to claim 14, in the absence of any showing of criticality, the specific optical component that is common to both modes of operation would have been an obvious design choice.

### ***Response to Arguments***

Applicant's arguments with respect to claims 7-10,12-14 have been considered but are moot in view of the new ground(s) of rejection.
